DETAILED ACTION

Claim Objections

1. Claims 62-65 are objected to because of the following informalities: They depend on Claim 13 which has been cancelled. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2, 4-8, 11-12, 17, 19-25, 28-43, 51, 54-55, 57, 59 and 60-69 are rejected under 35 U.S.C. 102(e) as being anticipated by Cooper et al. (6850417).

Cooper (Figures 1-7) shows a content protection apparatus (system or article) comprising a board 200 coupled to a device (another board, add-in card or adapter card) 208 via a connector 206 and a controller 202 attached to the board to detect the board's coupling condition to the device and perform a shutdown (removal of AC power from the board or the device) in response to the coupling condition. Both boards are printed circuit boards and include inner layer trace signals. An electrical circuit 210 is formed on the board 200. The board 208 overlaps the board 200 near the connector. The board 200 comprises a plurality of components having packages mounted on it which are difficult to probe. The package may be ball-grid array or flip-chip ball grid

array. The board 200 has a memory device 204 mounted on it which could store unique identifier. The connector 206 is surface mounted. The system might include a metal can enclosing a component.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 attached.
5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

6. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
